Application/Control Number: 10/082,280

Art Unit: 2621

### **DETAILED ACTION**

Page 2

## **Specification**

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

# Claim Rejections - 35 USC § 101

> 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

➤ Claim 20 is directed to non-statutory subject matter. "Program software for executing a decoding method for inputting and decoding variable-length coded data...".

Application/Control Number: 10/082,280

Art Unit: 2621

This claim is non-statutory because the terminology," Program software for executing a decoding method for inputting and decoding variable-length coded data", alone has no set definition; in this regard, as recited in MPEP 2106, computer-related inventions are either nonfunctional descriptive material or functional descriptive material, program software fall into the second category, wherein, descriptions or expressions of the program software, are not physical things, they are neither computer components nor statutory processes, as they are not acts being performed, such claimed program software do not define any structural and functional interrelationships between the program software and other claimed elements of a computer which permit the program software's functionality to be realized and are only statutory when recited as being embodied in a computer-readable storage medium.

Art Unit: 2621

## **Allowable Subject Matter**

- Claims 1-19 are allowed.
- Claim 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.
- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a decoding method and apparatus. The closest prior art, Kobayashi (USPN 6,411,229 B2), shows a similar system, in which, a variable length decoder which can reduce the processing time, the variable length decoder comprises plural decoding table address generation circuits, and a selector for selecting one of plural address candidates generated from these circuits. During decoding of one variable length code, the variable length decoder obtains address candidates for the next variable length code, and then selects one of the address candidates for the next variable length code on the basis of an obtained code length of the variable length code, to output the same to the decoding table RAM. However, Kobayashi fails to address: "for a comparison step of comparing input coded data with the minimum code

Art Unit: 2621

words or maximum code words outputted from the table selected at a table selection step by using N comparators and a class discrimination step of obtaining a class number corresponding to an initial code word of the input coded data based on results of comparison by the N comparators". These distinct features have been added to all independent claims and render them allowable.

#### **Contact Information**

- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amir Alavi whose telephone number is 703-306-5913.
- The examiner can normally be reached on Mon-Thu.. 8:00 am thru 6:30pm.If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Leo Boudreau can be reached on 703-305-4706.

Art Unit: 2621

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov.

Should you have questions on access to the Private PAIR system, contact the

Electronic Business Center (EBC) at 866-217-9197 (toll-free).
